

Board of Health Meeting - Tuesday, December 10, 2013 7:00 p.m.
116 Main Road, Tyringham

Board members present - Gerard Miller, Christopher Johnson
Others present - John Curtin, Noah Choquette, Molly Curtin-Schaefer.

BEAVER:

Noah Choquette was in to discuss one of the highway department employees being designated as the beaver control person. He has completed the training. The Town was going to get the traps. This issue has not moved forward and Noah wanted to ask the board if they plan on moving forward. The Board agreed that an employee trapping beavers would save the Town money and they agreed to investigate the trap purchase. The price of the traps are approximately -- Bailey traps \$378 and the Hancock Trap is \$419. The annual license fee is \$35.00. Noah is willing to trap for the town during working hours and he has no interest in trapping on his own. The question is can the Town own the traps? Noah will gather some information and it will be sent to Town Counsel.

Robert Tynan of ECO Dynamics submitted an operation & maintenance report for Perc-Rite drip dispersal system located at 44 Lakeside Drive, property of Janette Cooper Cimini. The report stated the system to be operating normally with no problems or issues.

Meeting adjourned at 7:17 p.m.

Absent

Peter Curtin, Chairman
