CCEP
Clean Energy Project

Where: Tyringham Town Hall
When: November 15, 6 PM
Who: Everyone is welcome
to join

Tyringham Clean Energy Co-op Members,

Please join us for the Co-op's first session in its Clean Energy Educational Series. In this session, learn all about **Heat Pumps**: an efficient way to heat and cool your home. By the end of the session, you will have the opportunity to learn:

- What heat pumps are, and how they work
- The different kinds of heat pumps that are available, and which might fit best for you
- Incentives available to reduce the cost of heat pumps

Members may also stay for an update on other aspects of the Co-op's projects.

Snacks will be served!

To begin to learn more about heat pumps and other types of innovative energy technologies, visit <http://communitycleanenergyproject.org/fact-sheets/>. If you have any questions, please reach out any time.

All the best,

Rachel
